

Since we opened in 1950, Telcoe Federal has steadily grown into one of the most respected full-service financial institutions in Arkansas. But we'll never outgrow our valued customers. We'll never be bought out by one of the big conglomerates because our members "own the store."

We believe our lifelong commitment to our financial partners sets Telcoe Federal apart from the ever changing and impersonal world of commercial banking. At Telcoe, members are much more to us than just an account number...they are part of the family.

The principles that set Telcoe Federal apart from other financial institutions, the stability and peace of mind that comes with member-ownership, and the financial advantages our competitive services provide all combine to make Telcoe Federal membership a very attractive benefit.

Not just anyone can walk into a credit union and sign up for membership. We currently serve over 200 Arkansas companies. Employees of these employers, and their immediate family are eligible to be a Telcoe Federal member...people who appreciate and benefit from doing business with a not-for-profit credit union.
