New Year New Goals

An estimated 80% of New Years Resolutions fail by mid-February every year, according to US News and World Report. Many of us start the year with great intentions: we really believe this will be “our year” – and then life happens, and maybe this isn’t “our year” after all (yet again).

If this sounds familiar, join us for a webinar to learn how to set AND actually reach your financial goals in 2024.

What You Will Learn

- How to set realistic goals that can actually be achieved
- The role financial habits play in reaching (or abandoning) your financial goals
- How to get back on track after a setback
